3. Overall I was satisfied with the quality of Nicholas Manganas's teaching

Raw comment data

The best features of Nicholas Manganas's teaching were

Comments
Very good tutor, approachable, facilitated class discussion successfully every week and backed that up with personal knowledge for every topic.
– the set out of the tutorials was really well done – having different groups tackle different questions and then a class discussion
He was great at interacting with students. Always played devils advocate to increase the views in the class room. Never biased.
Nick will let us lead the class discussion and always provides helpfull feedbacks. He will let the students talking more by putting them into small groups first and then do the discussion as a whole class.
Nick was a great tutor, and made the effort to engage the tutorial group and make everyone's opinions heard.
He was nice He didn't force people that were uncomfortable to speak
knowledge, useful feedback
The most enjoyable tutorial I have ever been in. The creativity in his teaching methods were incredible and I always enjoyed the extensive group discussions we had.
Nicholas Manganas provided very helpful feedback concerning the first blog posts we had to write. As that kind of homework was unprecedented for me, his comments have been utterly fruitful !
Very engaging discussions in the tutorial
Group discussion and encouragement
He has an engaging style of teaching and he seemed interested in student input

Nicholas Manganas's teaching could be improved by

Comments
N/A
Keep doing the good work.
I think Nick did a very good job.
Giving constructive feedback instead of "nice" or sometimes nothing at all – it made it difficult to know how to improve my marks and make my blog posts better.
course design :-)
Not much to fault in his teaching. Sometimes I wanted more feedback in blog posts, but I understand that the big cohort makes that very difficult.
I think that this class was mostly about student participation and in–group debates. It might be better for our general knowledge to have a balance between analyses of the teacher himself and opinions of the students.
nothing – its perfect
Sometimes guiding discussion a little more and having a bit more variety in his activities during tutorial
